SECTION 01

EURIBOR: the slow climb resumed

Weekly averages from our ECB data feed show all three key EURIBOR maturities drifting upward through late Q2 and early Q3 2026. The 3-month rate rose from 2.14% (week of May 11) to 2.34% (week of Jul 13) — a 20 basis-point move that flows directly into variable-rate loan resets.

What this means for borrowers: loans referencing 3M EURIBOR reprice four times a year and have already absorbed most of this move. 6M and 12M-referenced mortgages reset later — resets landing in H2 2026 will price roughly 15–20 bp above the spring level.

Norway sits apart: Norges Bank's policy rate held at 4.50% through the entire period, keeping Norwegian floating mortgage costs materially higher than eurozone equivalents.

Verified bank pricing: Estonia monitor

NordicRate runs automated daily monitoring of published loan pricing on bank websites. Figures below were captured directly from each bank’s public product pages on **18 July 2026**.

BANK	PRODUCT	PUBLISHED RATE	EFFECTIVE FLOOR*
LHV Pank	Consumer loan	from 5.90%	5.90%
LHV Pank	Home loan (energy class A/B)	1.49% + 6M EURIBOR	4.09%
Coop Pank	Small loan	from 7.90%	7.90%
Coop Pank	Home loan (energy class A)	1.49% + 6M EURIBOR	4.09%
Coop Pank	Car loan	from 6.90%	6.90%

* Effective floor = published margin + 6M EURIBOR (2.60%, Jul 13 week) where the bank prices against EURIBOR; otherwise the published "from" rate. Individual pricing depends on the applicant’s profile. Representative APRC on small consumer loans is substantially higher than the nominal rate (Coop Pank’s own example calculator shows 22.78% APRC on a small-amount scenario).

The margin illusion: headline mortgage offers like "from 1.49%" are margins, not total rates. The real floor today is ~4.1%. Any comparison site displaying the margin as the rate is misleading its users — and its partners.

Cross-market comparison

Lowest advertised rates currently listed on NordicRate, by market. Estonian figures are verified daily by automated monitoring; other markets reflect catalogued bank listings.

MARKET	PERSONAL FROM	MORTGAGE FROM	BUSINESS FROM
 Denmark (DKK)	6.99% – Danske Bank	2.75% – Nykredit	4.99% – Danske Bank
 Finland (EUR)	6.50% – OP	3.25% – OP	4.50% – OP
 Iceland (ISK)	8.90% – Landsbankinn	5.25% – Landsbankinn	8.00% – Íslandsbanki
 Norway (NOK)	6.90% – DNB	3.80% – DNB	5.50% – DNB
 Sweden (SEK)	6.49% – Nordea	3.50% – SBAB	4.75% – SEB
 Estonia (EUR)†	5.90% – LHV	4.09% – LHV / Coop	6.50% – Swedbank
 Latvia (EUR)	11.00% – Luminor	4.75% – Swedbank	6.50% – RIB Bank
 Lithuania (EUR)	10.50% – Luminor	4.50% – Swedbank	6.50% – Swedbank

† Estonia: live-verified 2026-07-18. Danish mortgage figure reflects the covered-bond (realkredit) system; Icelandic figures are non-indexed nominal rates. Rates are best advertised cases — individual offers depend on creditworthiness, amount and term.

The spread that matters: a eurozone borrower moving from Latvia to Estonia sees the same currency and the same EURIBOR — yet a 5-point gap on entry-level personal loan pricing. Cross-border rate awareness is worth real money, which is exactly the gap NordicRate exists to close.

Methodology & about

Data sources

- **Reference rates:** ECB SDMX API (EURIBOR 3/6/12M) and Norges Bank API, fetched hourly, aggregated to weekly averages. 3,300+ observations in the underlying series.
- **Bank pricing:** automated daily capture of published rates from bank product pages, with parse-quality controls and a human-readable evidence snippet stored per observation.
- **Catalogue:** 100+ loan and insurance products across 60+ institutions, maintained with verify-before-publish policy.

Honesty rules

- Margins are never presented as total rates — EURIBOR-linked offers are shown with the computed floor.
- No invented statistics, ratings or user counts. Everything in this report traces to a source we operate.
- Rates are indicative "best advertised" figures — individual pricing always depends on the applicant.

For lenders & brokers

NordicRate delivers AI-pre-qualified borrower leads (income, DTI, residency, loan size) across 8 markets on CPL/CPA terms — and this report's data pipeline is available as a partner feed.
